A presentation by Osi Ejiofor

What should a good school's digital strategy look like?

Three pronged approach to effective strategy

The Senior Leadership Team

Master Document

- **Entire vision as part of the SDP/ SIP**
- **Consider strengths of all staff and identified areas technology can reduce workload/ increase efficiency**
- **Intention for all students** (skills acquired for all)
- **Pedagogical approaches** (basis for effectiveness and measurable progress)
- **Back end and front end strategy**
- **Accessibility and safety for all**
- **Staff audit and development of skills (including all stakeholders)**
- **Assessment and review processes**
- **Fundraising strategy**

Strategy should incorporate

SLT

# Information Technology Facing Strategy should include

Guided direction of digital infrastructure needs and agreed steps to ensure:

- **Privacy and security**
- **Connectivity**
- **Server stability + longevity**
- **Procedures for onboarding and leaving staff**
- **Understanding of front end user requirements (MDM, BYOD, Application restrictions, storage etc)**
- **Issue reporting procedures**
- **Simple self-help guidance**
- **Process for additional software requests**

IT

Teacher Facing Strategy should include

- **School vision for use of technology**
- **Access to self audit of skills and confidence**
- **Access to self directed CPD**
- **Links to pedagogical approaches of focus for whole school**
- **Processes for improvement of practice** (team teaching/ record-review etc)
- **Clear steps for new to site teaching staff**
